Key messages for LPs:

- Built for families, by families — much more than just a fund. GENTIS is a bespoke community where families benefit from a selective global network, a dedicated Next Gen programme and various site visits and strategic connectivity.
- Direct access to our team, our operating partners and bespoke, one-to-one co-investment opportunities.
- European succession and scale-up as a structural opportunity: many founders have no natural successor and would much prefer an aligned buyer/partner like GENTIS.
- Families often prefer selling to families — founders see GENTIS as family capital, with deep cultural and professional alignment. Not classic PE.
- We would welcome getting to know families and family offices in the region and exploring how we might be helpful.
